Profile

For more than twenty years, I have worked in international hospitality, leading facilities, technical operations and technology across complex hotel environments.

My experience combines operational leadership with asset management, business transformation and digital technologies, supporting organisations through hotel openings, owner transitions, capital investment programmes and operational improvement.

Working closely with owners, executive management, contractors and multidisciplinary teams, I have focused on creating reliable operations that protect organisational assets, support business objectives and deliver consistent guest experiences.

I believe successful organisations are built when people, technology and infrastructure work together with clear responsibilities, accountability and continuous improvement. My objective has always been to simplify complexity, strengthen operational performance and leave organisations stronger than I found them.

Core Competencies

- Facilities & Technical Operations
- Strategic Facility Management
- Asset Lifecycle Management
- CAPEX Planning & FF&E Investments
- Hotel Openings & Operational Readiness
- Owner Relations & Stakeholder Management
- Business Continuity & Risk Management
